

How To Make And Use A Plasma Energy Station

What Is A Plasma Energy Station?

What Is A Plasma Energy Station ?

- A container holding distilled or filtered water
- Surrounded by vials of various plasmatic waters taken from GANS (Gas In Atomic Nano Solid State)
- The distilled or filtered water inside the container holds the plasmatic energy fields (PE) from the vials
- Only the distilled or filtered water (PE water) is used, not the water in the vials
- It's a Never Ending supply of PE water

What Is A Plasma Energy Station ?

- The Plasma Energy Station is like a food pantry.
- A food pantry holds all kinds of ingredients for baking-flours, sugars, salt, spices, yeast, etc. together in one place.
- In the Plasma Energy Station 'pantry' you also have many different ingredients - plasmatic energy fields of elements, minerals, metals, herbs, food, etc. held in one container.
- Just because the ingredients in both pantries are near each other does not mean they will ever become each other or something else. The plasmatic energy field of Carbon Dioxide will never become the plasmatic energy field of Magnesium just like flour will never become sugar or salt.
- Just as in the food pantry the plasma energy pantry holds ingredients that serve different purposes. Salt has a different purpose than sugar just like the plasmatic energy field of Zinc Oxide has a different purpose than the plasmatic energy field of copper.
- If your intention is to make bread you will combine the flour, yeast, sugar and salt according to your recipe. If you don't take any action, the ingredients do not make the bread by themselves just sitting in the pantry.

It is similar with the plasmatic energy fields. It is your *intention* to make a cold relief formula using the plasmatic energy fields that allows those fields to be placed into the jar you've designated to hold your cold relief formula.

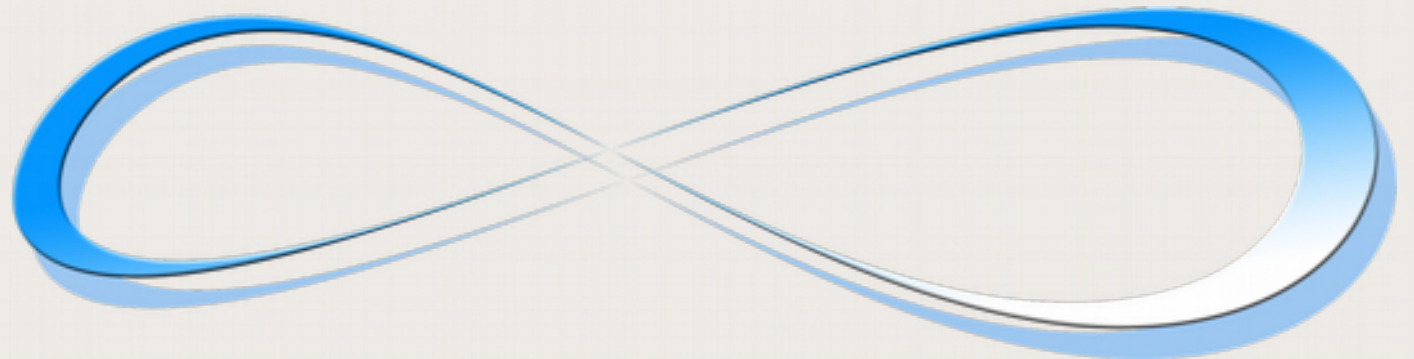

- Working with plasmatic energy fields gives you the opportunity to use different combinations for different recipes (protocols).

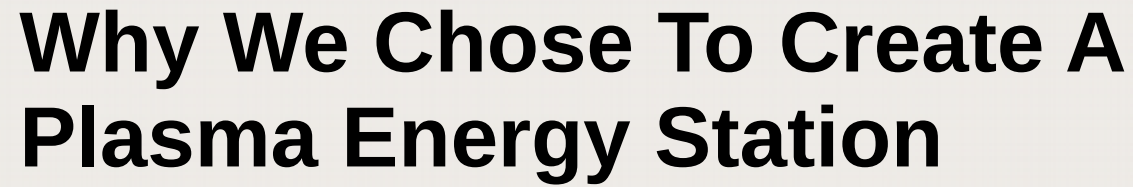

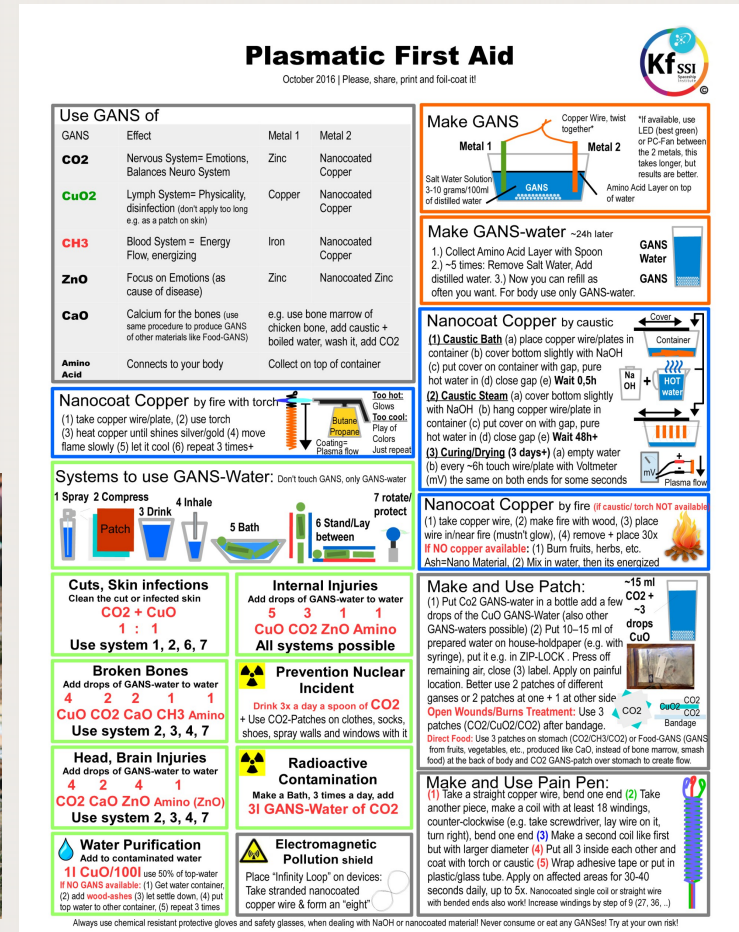

Purpose Of A Plasma Energy Station

- A Scientist working with plasma energy stated that we are not healing the body with the plasma energy water.
- We are changing the condition that allows the body to be in balance and to correct itself.
- The plasmatic energy is seeking to create a balance.

- To Provide the Plasma Energy of food when there are food shortages in times of emergencies
- As a First Aid Kit

What Can You Do In An Emergency Situation ?

- How do you work with the plasmatic energy fields?
- Get the Plasmatic First Aid Chart found on our website and follow instructions on it and use the combinations of liquid plasmas for various conditions.
- Your intention used with all the plasmatic energy fields present within your plasma energy station gives you what you need to help yourself and others in a disaster situation.
- The station includes two vials containing the plasmatic energy fields of various foods to help when there is a food shortage.

Plasmatic First Aid
October 2016 | Please, share, print and folio-card it!

Use GANS of

GANS	Effect	Metal 1	Metal 2
CO2	Nervous System= Emotions, Balances Neuro System	Zinc	Nanocoated Copper
CuO2	Lymph System= Physically, Disinfection (can apply too long e.g. as a patch on skin)	Copper	Nanocoated Copper
CH3	Blood System = Energy Flow, energizing	Iron	Nanocoated Copper
ZnO	Focus on Emotions (as cause of disease)	Zinc	Nanocoated Zinc
CaO	Calcium for the bones (use same procedure to produce GANS of other materials like Food-GANS)	e.g. use bone marrow of chicken bone, add caustic + boiled water, wash it, add CO2	
Amino Acid	Connects to your body	Collected on top of container	

Make GANS

Copper Wire, bent "If available, use Neoprene"
Salt Water Solution 2-10 grams/liter of distilled water
GANS
Amino Acid Layer on top of water

Make GANS-water -> 450 ml

1) Collected Amino Acid Layer with Spoon
2) >5 times: Remove Salt Water, Add distilled water. 3) Now you can refill as often you want. For body use only GANS-water.

Nanocoat Copper by caustic

(1) **Caustic Bath** (a) place copper wireplates in container (b) cover bottom slightly with NaOH (c) put cover on container with gap, pure hot water in (d) close gap (e) **Wait 0.5h**
(2) **Caustic Steam** (a) cover bottom slightly with NaOH (b) hang copper wireplate in container (c) put cover on with gap, pure hot water in (d) close gap (e) **Wait 48h+**
(3) **Cleaning/Drying (0 days+)** (a) empty water (b) every <6h touch wireplate with Voltmeter (mV) the same on both ends for some seconds

Nanocoat Copper by fire (caustic torch NOT available)

(1) take copper wire, (2) make fire with wood, (3) place wire in linear fire (mustn't glow), (4) remove + place 30s if NO copper available: (1) Burn fruits, herbs, etc. Ash/Nano Material, (2) Mix in water, then its energized

Make and Use Patch:

(1) Put CO2 GANS-water in a bottle add a few drops of the CuO GANS-Water (also other GANS-waters possible) (2) Put 10-15 ml of prepared water on house-holdpaper (e.g. with syringe), put it e.g. in ZIP-LOCK. Press off remaining air, close (3) label. Apply on painful location. Better use 2 patches of different gasses or 2 patches at one + 1 at other side.
Open Wounds/Burns Treatment: Use 3 CO2 patches (CO2/CuO/CO2) after bandage.
Direct Food: Use 3 patches on stomach (CO2/CH3/CO2) or Food-GANS (GANS from fruits, vegetables, etc., produced like CuO, instead of some marine growth food) at the back of the body and CO2 GANS patch over stomach to create flow

Make and Use Pain Pen:

(1) Take a straight copper wire, bend one end (2) Take another place, make a coil with at least 18 windings counter-clockwise (e.g. take screwdriver, lay wire on it, turn right), bend one end (3) Make a second coil like first but with larger diameter (4) Put all 3 inside each other and coat with torch or caustic (5) Wrap adhesive tape or put in plastic/glass tube. Apply on affected areas for 30-40 seconds daily, up to 5x. Increased angle or in straight wire with banded ends also work! Increase winding by step of 9 (27, 36, ...)

Systems to use GANS-Water: Don't touch GANS, only GANS-water

1 Spray 2 Compress 3 Drink 4 Inhale 5 Bath 6 Stand/Lay between 7 rotate protect

Cuts, Skin Infections
Clean the cut or infected skin
CO2 + CuO
1 : 1
Use system 1, 2, 6, 7

Internal Injuries
Add drops of GANS-water to water
5 3 1 1
CuO CO2 ZnO Amino
All systems possible

Broken Bones
Add drops of GANS-water to water
4 2 2 1 1
CuO CO2 CaO CH3 Amino
Use system 2, 3, 4, 7

Head, Brain Injuries
Add drops of GANS-water to water
4 2 4 1
CO2 CaO ZnO Amino (ZnO)
Use system 2, 3, 4, 7

Water Purification
Add to contaminated water
11 **CuO/H2O2** use 5% of top water if NO GANS available: (1) let water container (2) add wind-wire (3) let settle down, (4) put top water in other container, (5) repeat 3 times

Prevention Nuclear Incident
Drink 3x a day a spoon or CO2 + Use CO2-Patches on clothes, socks, shoes, spray walls and windows with it

Radioactive Contamination
Make a Bath, 3 times a day, add 3l GANS-Water of CO2

Electromagnetic Pollution shield
Place "Infinity Loop" on devices. Take stranded nanocoated copper wire & form an "infinity"

Always use chemical resistant protective gloves and safety glasses, when dealing with NaOH or nanocoated material! Never consume or eat any GANS! Try at your own risk!

Your Intention

- Intention has been visually demonstrated by Dr. Masaru Emoto's photographs.
- When we use our intention with our plasma energy water it directs the plasmatic fields to do the job we intend them to do.
- Intention is one of the most powerful gifts we have been given by our soul's Creator.
- The water in our bodies is alive and responsive to our every thought and emotion.

Make Specific Products-For People, Plants, and Pets

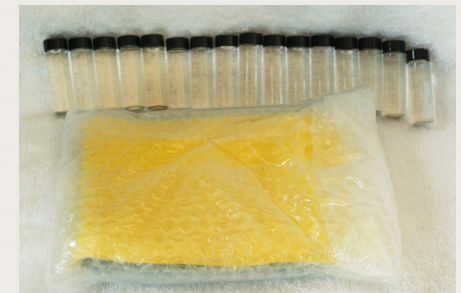

- The Plasma Energy emanating from these vials does not deplete over time
- Place closed vial inside a container of distilled or filtered water-never open vial
- Let the water change by absorbing the plasmatic energy fields for 24 hours
- Drink, spray, bathe from changed water only

Pads or Vials ?

- Pads Simplify shipping internationally-Fits in envelope
- Place two pads, *one pad 3 times thicker than other*, on opposite sides of pitcher of distilled or filtered water for 24 hours. Use plasma energy water to drink, bathe, spray, etc.
- Since pads are uneven in thickness, the plasmatic energy fields will create an infinity loop to create a balanced field in the water. 
- Label with intention- 'relief of pain', 'peace', 'perfect health'
- Pads have same strength of plasmatic energy fields as vials.

Pads or Vials ?

How to use the pads for relief of pain in the body-

Place one pad on each side of body needing relief, for the knee place a pad on each side of knee.

Secure in place with bandage

Have one pad 3 times thicker than other to create an infinity loop so the plasmatic energies will try to create a balance.

Place pad inside pillowcase, under mattress, under hat, or where ever the plasmatic energies will be close to the area of the body that needs relief.
